

## St. Mary's Maths Eyes Challenge 3

We have another exciting Maths challenge for our students to complete at home 😊

Maths is everywhere in our world. Maths Eyes gives us a new way of looking at familiar things. Having 'Maths Eyes' helps people to understand that Maths is more than skills and tasks we do at school but that Maths is all around us.

This challenge is all about Maths in your kitchen presses 😊

### What do you need to do?

Pick five items from the presses in your kitchen and record the weight of each item in grammes (g) or kilogrammes (kg). Do you know how many grammes make up one kilogramme? Do any of these items weigh the same?

Let's look at an example:

This box of Cornflakes weighs 1kg or 1 kilogramme. I found the weight on the front of the package.

This pack of Tayto Crisps weighs 35g. I found the weight on the back of the package.

**Your task for this week:**

Send a **whats app** of the five items (maximum) and their weights to Ms. O'Connor on the HSCL phone - 086 3123122.

There will be spot prizes for participation 😊

Good luck and have lots of Maths fun.
