

## St. Mary's Maths Eyes Challenge 2

We have another exciting Maths challenge for our students to complete at home 😊

Maths is everywhere in our world. Maths Eyes gives us a new way of looking at familiar things. Having 'Maths Eyes' helps people to understand that Maths is more than skills and tasks we do at school but that Maths is all around us.

This challenge is all about Maths Trails 😊 Maths Trails are a great way to help learners to further develop their Maths Eyes and problem solving strategies.

### What is a Maths trail?

A Maths trail is a walk through an area (can be indoors or outdoors) where people experience Maths in the real world. A Maths trail highlights the huge use of number we make in our everyday life and how Maths surrounds us even in the most unusual areas.

### Let's Look at a Maths Eyes Maths trail example:

Follow this link to look at a Maths trail in Griffeen Valley Park, Lucan or Corcagh Park and Sean Walsh Park in Dublin 24. You will get lots of ideas of how to create your own Maths trail by looking at these examples.

<http://www.haveyougotmathseyes.com/maths-trail/>

**Your task for this week:**

Create your own Maths trail (perhaps in your garden or if you live beside a park).

Your Maths trail must have 5 stops. You need a picture for each stop and a question to go with the picture. Use the template below to plan your Maths trail.

**My Maths Trail:**

Where is your Maths Trail located? \_\_\_\_\_

Stop Number:	Photo:	Question:
1		
2		
3		
4		
5		

Send a **whats app** of the five pictures (maximum) and the question to go with each picture to Ms. O'Connor on the HSCL phone - 086 3123122.

There will be spot prizes for creativity and participation 😊

Good luck and have lots of Maths fun.
